**MAP LEGEND**

Landing site,  
Surface gravity,  
Spectral type.

Hazardous site  
A facility here is susceptible  
to the Disaster event.

Grav dots  
Blast-offs, landings,  
or slingshots.

Burn dot  
Rockets must expend  
an impulse to cross.

Radiation belt  
Travel is susceptible to  
the Disaster event if  
acceleration  
is less than three.

HEO Highly Eccentric Orbit  
LO Low Orbit

**SCALE**

Each orbital = 2 month's travel  
Each impulse dot = 2.5 km/sec

**GUARANTEED STRIKE**

**DENSITY DRAWN**  
Any icy site will  
automatically have  
this mining tile,  
in addition to the  
tile drawn.

The density of the find and the Risk or  
Radiation icons are taken from the tile  
that was drawn.  
The input icons are fixed, as shown here.
